Red Bull BASEMENT

Making sure you win the cart, when AI does the shopping.

20% of all Black Friday shopping was done by AI Agents, but today,
90% of stores aren't even checkout-able

What we do?

1 Making your store AI trustable

We implement UCP, the new commerce protocol that lets AI agents transact with your catalog. Most stores still can't. We make yours one of the few that can.

2 Keeping your store winning

We simulate ChatGPT, Gemini, Claude and Perplexity shopping your products against competitors. We diagnose why you lose, rewrite the listing, and publish the fix back to your store.

How it works?

1 Connect	2 Simulate	3 Diagnose	4 Publish
One-Click Shopify install. Catalog synced in minutes.	Every SKU shopped by GPT-4, Claude & more.	Agent Replay shows exactly why you lost the cart	AI rewrites the listing and ships straight to your store

Traction

100+ simulations run

+12 pts visibility lift

0 → top 5 client's category

Dua · avatid · Red Bull · PLUG AND PLAY

> "40% traffic drop after Gemini 3.1.
> We didn't know why. We couldn't fix it
>
