
écentic
The merchant-side optimization layer for agentic commerce.

The buyer has changed.
The playbook hasn’t.
That's a problem.

the solution

écentic

The merchant-side optimization layer for agentic commerce.

diagnose

optimise

simulate

publish

our secret sauce

Three things no competitor does

Active Simulation

We stage real competitive buying sessions. We tell you your actual agent win rate.

Closed-Loop Automation

We don't suggest fixes. We write them and publish them to your store. Automatically.

First on UCP + ACP

Built for both Google UCP and OpenAI's ACP. First tool that scores readiness across both standards.
