# Win every agent's cart.

Shelf simulates how AI shopping agents choose between your products and competitors then automatically rewrites your listings to get picked first.
Not monitoring. Not auditing. Autonomous optimization.

● The Blind Spot

## Your products are invisible to the buyers that matter most.

AI agents are already shopping for your customers. They don't see ads or scroll your page. They read data, compare specs, and choose in milliseconds. You don't know how often they pick you or how to change it.

What Humans See

**Pro Wireless Earbuds - Light**

Immerse yourself in crystal clear sound with our award-winning ergonomic design. The perfect companion for your daily commute.

Add to Cart - $139

What Agents See

```
{
"product": "Earbuds",
"brand": "Pro Audio",
"price": 139.00,
"battery_life": null,
// FATAL: Agent rejected
"warranty": null,
// FATAL: Agent rejected
"description": "Immerse yourself... "
}
```

RESULT: Dropped from consideration set.
Competitor chosen due to explicit spec verification.

## From blind to winning in three steps.

A closed-loop system designed exclusively for the AI agent economy.

### Simulate

AI agents are already shopping for your customers. They don't see ads or scroll your page. They read data, compare specs, and choose in milliseconds. You don't know how often they pick you or how to change it.

### Diagnose

ecentric shows you exactly WHY agents pick competitors over you. Missing specs? Ambiguous sizing? Weaker warranty language? You get a per-product breakdown of every attribute costing you market share.

### Optimize (Auto)

ecentric auto-generates optimized product titles, descriptions, and structured data tuned for maximum agent selection. Approve in one click, or set to auto-publish. Continuously re-optimized as models drift.

## Infrastructure for the agent economy.

### Agent Win Rate Dashboard

See how often each product in your catalog is selected by AI agents vs. competitors, broken down by model (GPT, Claude, Gemini). Updated daily.

### Multi-Model Engine

We test every product across 5+ agent models, mapped to their unique selection biases.

### Competitor Battlecards

Know exactly which competitor products are beating yours, and on which specific attributes.

### UCP Readiness & Structured Data

Generage your `/.well-known/` ucp merchant profile. Extract attributes from images and descriptions to fill gaps your competitors don't have.

## Audits tell you what's broken. ecentric fixes it.

| Capabilities | Audit Tools | GEO Monitoring | ecentric |
|---|---|---|---|
| Tells you if products are "AI-ready" | ✓ | — | ✓ |
| Tracks brand mentions in AI search | — | ✓ | ✓ |
| Simulates actual agent purchasing | — | — | ✓ |
| Measures win rate vs. specific competitors | — | — | ✓ |
| Auto-generates optimized listings | Partial | — | ✓ |
| Re-optimizes when models update | — | — | ✓ |
